

We are pleased to be leading the search for the
position of

Chief Operating Officer

at

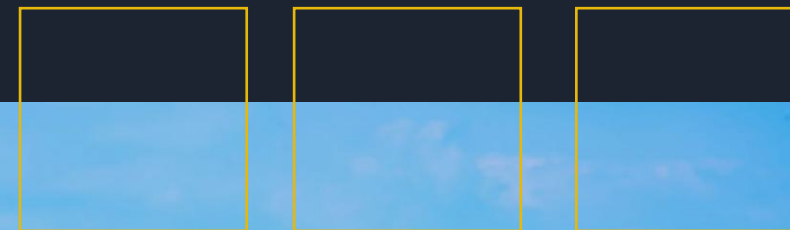

The autonomous public company is active at the heart of Europe, in one of the busiest and most complex sections of airspace of the continent.

skeyes ensures the safety and efficiency of air traffic in Belgium 24 hours a day, 7 days a week.

skeyes air traffic controllers manage over 3,000 aircraft every day, which makes up over a million flight movements per year.

skeyes is active at Brussels Airport and at the airports of Antwerp, Charleroi, Kortrijk, Liège and Ostend.

Thanks to its CANAC 2 control centre **skeyes** manages the flight movements above Belgium and a part of Luxembourg up to an altitude of 7,500 metres.

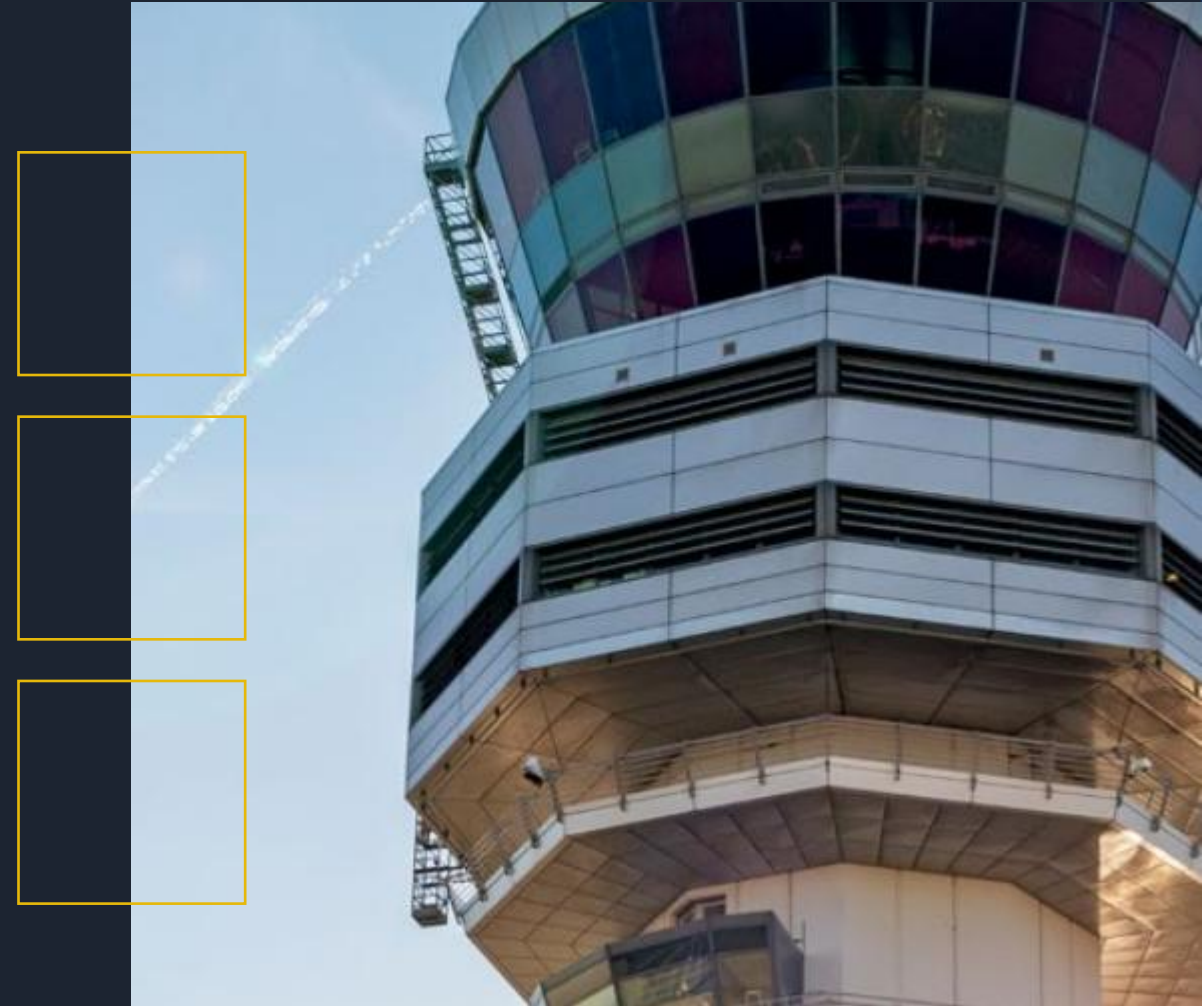

The company relies on its 970+ experienced staff members who are at the service of their customers: airline companies, airports, the aviation sector and the authorities.

skeyes is a member of FABEC, a joint airspace block (Belgium, Luxembourg, the Netherlands, Germany, France and Switzerland) with the aim of improving air navigation efficiency in the heart of Europe in the framework of the Single European Sky.

THE ROLE

- As Chief Operating Officer (COO), you will ensure the safety and continuity of air traffic operations, oversee the realization and guidance of major traffic flows, and implement measures to maintain high standards of air traffic management and control.
- Leveraging your industry experience, you will balance strategic planning, operational management, continuous improvement, and cross-department collaboration (data, technology, and operations) to ensure smooth operational activities.
- Key focus areas include business resilience, OPS performance, tech services management, UTM review, AIM optimisation, and data and aviation intelligence.

PROFILE

- Experience in Air Traffic Management is a must.
- At least 10 years of operational experience in air traffic control, from which at least 5 years in a leadership role at the level of director or higher senior management with an experience in managing large teams.
- Proven track record of managing complex aviation programs, advocating policy changes, implementing efficient operational systems.
- Familiar with terminal and en route operations, safety, security, and emergency management.
- Strong leadership, strong strategic clarity, achievement driven, strong resilience and adaptability.
- Successful change leader who leads by example, who understands and translates strategic objectives into actionable plans.
- Skilled in maintaining effective relationships with stakeholders and regulatory agencies.
- People mgt : responsible for +/- 600 people
- Fluent in Dutch, English and French.
